

Self/Partner Evaluation for Project 1

MATH 130: Calculus I

Your Name: _____

Your Partners' Names: _____

Section Number: _____

Your responses will contribute to your final score and your partner's final score on the project. The more detailed, reflective and honest your responses, the better I can evaluate each individual's contributions.

1. What was the most interesting and/or exciting part about working on this project?

2. What was the most frustrating and/or difficult part about working on this project?

3. What do you consider to be **your** greatest personal contribution to this project?

4. List at least one positive contribution each of **your partners** made and one negative drawback of working with each of **your partners**. Be sure to make it clear which partner you are talking about for each comment (it may be the same comments for each partner or it may be different).

5. Suppose your group was paid \$1500 for your presentation and final paper. Think about the proportional contributions you and your partners each made. How you would distribute the money between the three of you? List dollar amounts in the box for each person. Be sure to identify your partners by name.

Partner:	Partner:	You

6. Suppose you and your partners can **each** earn up to 10 points for your work on the presentation and final paper. How many points do you feel you each deserve? Be sure to identify your partners by name.

Partner:	Partner:	You

7. Finally, if you had 25 points to distribute among the three of you, how would you split up the points? The total **must** add up to 25 and you may use whole numbers only (no fractions or decimals).

Partner:	Partner:	You
