In Class 9/5

- don't forget to label (0,0)
- determine both position (x,y) and size w×h
- today's exercises will involve writing sketches to draw the same pictures
  - if you discover that your positions or sizes aren't quite right, go back to the picture to work out corrected values – don't just trial-and-error until it looks OK

- grading scale for in-class exercises
  - 0 = no handin
  - − = little progress or way off base
  - ✔ = reasonable progress
- many 0s or −s can lower your final grade
