

Self/Partner Evaluation for Project 1

MATH 130: Calculus I

Your Name: _____

Your Partner's Name: _____

Section Number: _____

Your responses will contribute to your final score and your partner's final score on the project. The more detailed, reflective and honest your responses, the better I can evaluate each individual's contributions.

1. What was the most interesting and/or exciting part about working on this project?

2. What was the most frustrating and/or difficult part about working on this project?

3. What do you consider to be **your** greatest personal contribution to this project?

4. List at least one positive contribution **your partner** made and one negative drawback of working with **your partner**.

5. Suppose your group was paid \$1000 for your presentation and final paper. Think about the proportional contributions you and your partner each made. How you would distribute the money between the two of you? List dollar amounts in the box for each person.

Your Partner	You

6. Suppose you and your partner can **each** earn up to 10 points for your work on the presentation and final paper. How many points do you feel you each deserve?

Your Partner	You

7. Finally, if you had 23 points to distribute among the two of you, how would you split up the points? The total **must** add up to 23 and you may use whole numbers only (no fractions or decimals).

Your Partner	You
