

## Problems?

- remotedesktop.hws.edu was down – IT is working on the issue but it may happen again
- if you have problems or annoyances with the Linux systems (actual computers or virtual desktop), send me email!

## Lab 1 – Sketch Handin

- make sure you copy the whole sketch folder (lab1) and not just the file (lab1.pde) to your handin directory

## Lab 1 – Pathnames

- be careful not to mix up how the Files application labels things in its display and the actual pathname

a user's home directory is `/home/username`  
Or `~`  
the pathname for this directory is  
`/home/bridgeman/cs120/sketchbook` or  
`~/cs120/sketchbook`

the root directory is `/`  
the pathname for the course handin  
directory is `/classes/cs120/handin`

## Lab 1 – Pathnames

- for files, the filename is part of the full pathname

the pathname for the selected file is  
`/home/bridgeman/cs120/sketchbook/lab1/lab1.pde` or  
`~/cs120/sketchbook/lab1/lab1.pde`
